# RSC6105S、RSC6107S RSC6112S、RSC6120S

•

#### Features

- Regulation of LED current and voltage with no Flicker
- PSR +/-5% Primary Side ,50% duty cycle, variable frequency control of resonant half-bridge
- Automatic dead time control and capacitive mode protection
- Integrated 2mA high voltage starting circuit
  - Protection modes:
    - Overload
    - No-Load
    - Over-temperature
- Low output capacitance allows live LED connection
- Very low output current ripple <2%
- Power up to 200W and Eff >91%
- Integrated half-bridge drive
- THD optimization ensures low harmonic distortion (THD less than 10 percent @AC 230V)

## Introduction

# SOP-14

# Applications

- Single stage PFC LED
  drivers without flicker
- Applicable power range
  up to 400W

The RSC61XXS Series is a high performance LED constant current resonant mode controller designed specially for high efficiency half-bridge LLC Converter,Maximum 150 KHz HB switching frequency and Up to 600V input voltage range.

The RSC61XX5S Series VCC power supply voltage operating range is 8V~20V and static operating current was 720uA. The chip has the function of current crossing zero detection(ZCD) which can automatically set dead time to prevent high and low output Simultaneous conduction of the MOSFET.

# Pin Configuration and Functionality

• Pin configuration with SOP-14

Figure 2 Pin configuration with sop-14

#### Table 1 Pin names

Pin	Symbol	Function
1	VINS	High Voltage Start up
2		NC
3	VCC	IC power supply
4		NC
5	FB	PSR Feedback input for output voltage regulation.Connect to primary sense winding.
6	CS	PSR Current Sense input provides output current regulation
7	GND	IC ground
8	PGND	Power ground
9	LG	Gate logic for low side switch
10	PVCC	Power supply
11		NC
12	HS	Ground for floating HS driver of HB
13	HG	Gate logic for high side switch
14	HB	Power supply of the HS floating driver of HB

#### **Product Model**

NO.	Product Model	Power Range
1	RSC6105S	Applied in LED driver below 50W
2	RSC6107S	Applied in LED driver below 75W
3	RSC6112S	Applied in LED driver below 120W
4	RSC6120S	Applied in LED drive above 150W

## **Absolute Maximum ratings**

Symbol	Name	Value	Units
VIN	High Voltage Start up	150~600	V
VCC	Signal power supply	-0.3~20	V
FB	Output voltage feedback	-0.3~5	V
CS	Current sensing	-0.3~5	V
LG	Gate logic for low side switch	-0.3~VCC+0.3	V
PVCC	Power supply	-0.3~20	V
HB	Power supply of the HS floating driver of HB	-0.3~600	V
HS	Ground for floating HS driver of HB	HB-20~HB+0.3	V
HG	Gate logic for high side switch	HS-0.3~HB+0.3	V
Tstg	Storage temperature	-55 to 150	°C
Tsolder	Lead temperature	260℃, 10s	
ESD	Human body model, JESD22-A114	2000	V

CAUTION: Permanent damage may result if a device is subjected to operating conditions at or in excess of absolute maximum ratings.

#### RSC6112S、RSC6120S

Shows a typical LED driver application using RSC6105S with LLC topology

Figure 4 Typical application circuit

#### Creating the PCB

There are a few key areas that are important to layout correctly in order to have a good design. Please follow these guidelines:

- 1. Put the filter capacitors and Bootstrap capacitors to the corresponding pins as closely as possible ;
- 2. Keep the track connected to the PIN( LG , HG) and MOSFET (Gate) as short as possible;
- 3. Keep the bootstrap capacitors part running as short as possible for more stable working;

**Disclaimers:** 

Reasunos Semiconductor Technology CO.,LTD(Reasunos)reserves the right to make changes without notice in order to improve reliability,function or design and to discontinue any product or service without notice .Customers should obtain the latest relevant information before orders and should verify that such information in current and complete.All products are sold subject to Reasunos's terms and conditions supplied at the time of order acknowledgement. Reasunos Semiconductor Technology CO.,LTD warrants performance of its hardware products to the speciffications at the time of sale.Testing,reliability and quality control are used to the extene Reasunos deems necessary to support this warrantee. Except where agreed upon by contr-

actual agreement,testing of all parameters of each product is not necessarily performed. Reasunos Semiconductor Technology CO.,LTD does not assume any liability arising from the use of any product or circuit designs described herein.Customers are responsible for their products and applications using Reasunos's components.To minimize risk,customers must provide

adequate design and operating safeguards.

Reasunos Semiconductor Technology CO.,LTD does not warrant or convey any license either expressed or implied under its patent rights,nor the rights of others.Reproduction of information in Reasunos's data sheeets or data books is permissible only if reproduction is without modification oralteration.Reproduction of this information with any alteration is an unfair and deceptive business practice. Reasunos Semiconductor Technology CO.,LTD is not responsible or liable for such altered documentation.

Resale of Reasunos's products with statements different from or beyond the parameters stated by Reasunos Semiconductor Technology CO.,LTD for that product or service voids all express or implied warrantees for the associated Reasunos's product or service and is unfair and deceptive business practice. Reasunos Semiconductor Technology CO.,LTD is not responsible or liable for such statements.

#### Life Support Policy:

Reasunos Semiconductor Technology CO.,LTD's Products are not authorized for use as critical components in life support devices or systems without the expressed written approval of Reasunos Semiconductor Technology CO.,LTD.

As used herein:

1.Life support devices or systems are devices or systems which:

a.are intended for surgical implant into the human body,

b.support or sustain life,

c.whose failuer to when properly used in accordance with instructions for used provided in the laeling,can be reasonably expected to result in significant injury to the user.

system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
